WORK EXPERIENCE

Penetration Tester & Security Developer

Jan 2024 – Present

Freelance / Self-Employed

Remote

- Conducted OWASP Top 10 web application pentests; delivered PoC exploit reports with CVSS scores and actionable remediation steps.
- Built agentic AI workflows using LLM APIs to automate subdomain enumeration, endpoint fuzzing, and vulnerability triage.
- Operated Mythic C2 for red team simulations: Poseidon agents, malleable HTTPS profiles, process injection, and AV/EDR evasion.
- Shipped 15+ secure web applications; improved performance by 30%, CSP and JWT hardening.
- Developed an [automated SQLi / XSS / SSRF scanner](#) actively used in CTF competitions.
